PROFESSIONAL EXPERIENCE

Akinon

Backend Developer | Remote

August 2023 – Present

- Analyze and resolve critical production issues, achieving on-time resolution rate for high-priority bugs.
- Maintain and enhance backend systems supporting an average of 1 million daily active users across multiple platforms.
- Regularly conduct code reviews and knowledge sharing sessions, fostering a culture of continuous improvement within the team.
- Mentored a junior developer, reducing their onboarding time by 30%, and enhancing team capacity for project execution.
- Achieved and maintained a 95%+ customer satisfaction rate through efficient bug fixes and timely feature rollouts, ensuring client retention and positive feedback.
- Integrated top-tier brands with global B2B and B2C marketplaces (Amazon, Walmart, European, Russian, and Indian e-commerce channels), expanding market reach and driving revenue growth.
- Developed scalable extensions and e-commerce solutions using Django, FastAPI, Celery, AWS, PostgreSQL, Redis, and Elasticsearch, resulting in a 30% improvement in client satisfaction through enhanced performance and reliability.
- Collaborate with cross-functional teams to identify root causes of recurring issues, contributing to a 25% reduction in repeat incidents.
- Leveraged Jira, Bitbucket, Metabase, and Sentry for effective project management and error monitoring, reducing project turnaround time by 25%, ensuring timely delivery and high project success rates.

Freelance

Full Stack Developer | Remote

September 2022 – Present

- Developed web applications and automation scripts using Python, JavaScript, and cloud technologies, increasing efficiency and streamlining client operations.
- Created scalable e-commerce solutions, including user engagement tools that enhanced customer interaction and satisfaction.
- Collaborated with clients to understand their needs and deliver customized solutions that met their business objectives and technical requirements.

KREA Digital

Full-Stack Developer | Remote

January 2022 – September 2022

- Engineered frontend extensions and recommendation algorithms for e-commerce campaign management, boosting campaign effectiveness by 20% and driving higher engagement rates.
- Integrated Google Ads API with the company panel, streamlining the ad creation workflow and reducing setup time, resulting in better reporting and faster go-to-market strategies.
- Implemented Google Cloud Platform for hosting, serverless functions, and CDN, reducing infrastructure costs by 15% and improving application performance and reliability.
